Bikin Data Base

CREATE DATABASE dbsevis;

Bikin Table

CREATE TABLE pelanggan(

di_pelanggan int (11) PRIMARY KEY,

nama varchar (20),

alamat varchar (30),

no_telepon int (13)

);

CREATE TABLE costomer(

di_costumer int (11) PRIMARY KEY,

id_pelanggan int (11),

ussername varchar (20),

tanggal_masuk date,

keterangan varchar (10),

harga int,

alamat varchar (30),

no_telepon int (13)

);

CREATE TABLE pegawai(

ussername varchar (20) PRIMARY KEY,

nama varchar (20),

PASSWORD varchar (30),

no_telepon int (13)

);

Masukan ke dalam table

1.Tabel Pegawai

INSERT INTO pegawai VALUES ("1001","Indra","1234","083873525323");

2. Tabel Pelanggan

INSERT INTO pelanggan VALUES ("1011","Yudi","Katapang Kulon","08387352546");

3. Tabel Costumer

INSERT INTO costomer VALUES ("10001","1011","Indra","01 Oktober 2018","LuarBiasa","25000","Katapang Kulon","0924757843");
